noon & on contd.

Drove up to Rex Whitings & reviewed our final list & double checked our loads in our trucks. we shifted 4-90# sacks of conout to Rex Whitings truck.

Then I drove home & kissed Paul & my blessed wife & put in some last minute things. Shirley plans to come up tomorrow morning with Leon & Elda Ritchie. Grant Shelton & Darlene and John & Lois Carlisle will all come tomorrow to Soldier Summit.

Floyd Webster & I drove back to Rex & Florines & we all left at 1:00 pm 6-21-85. They had Brett with them.

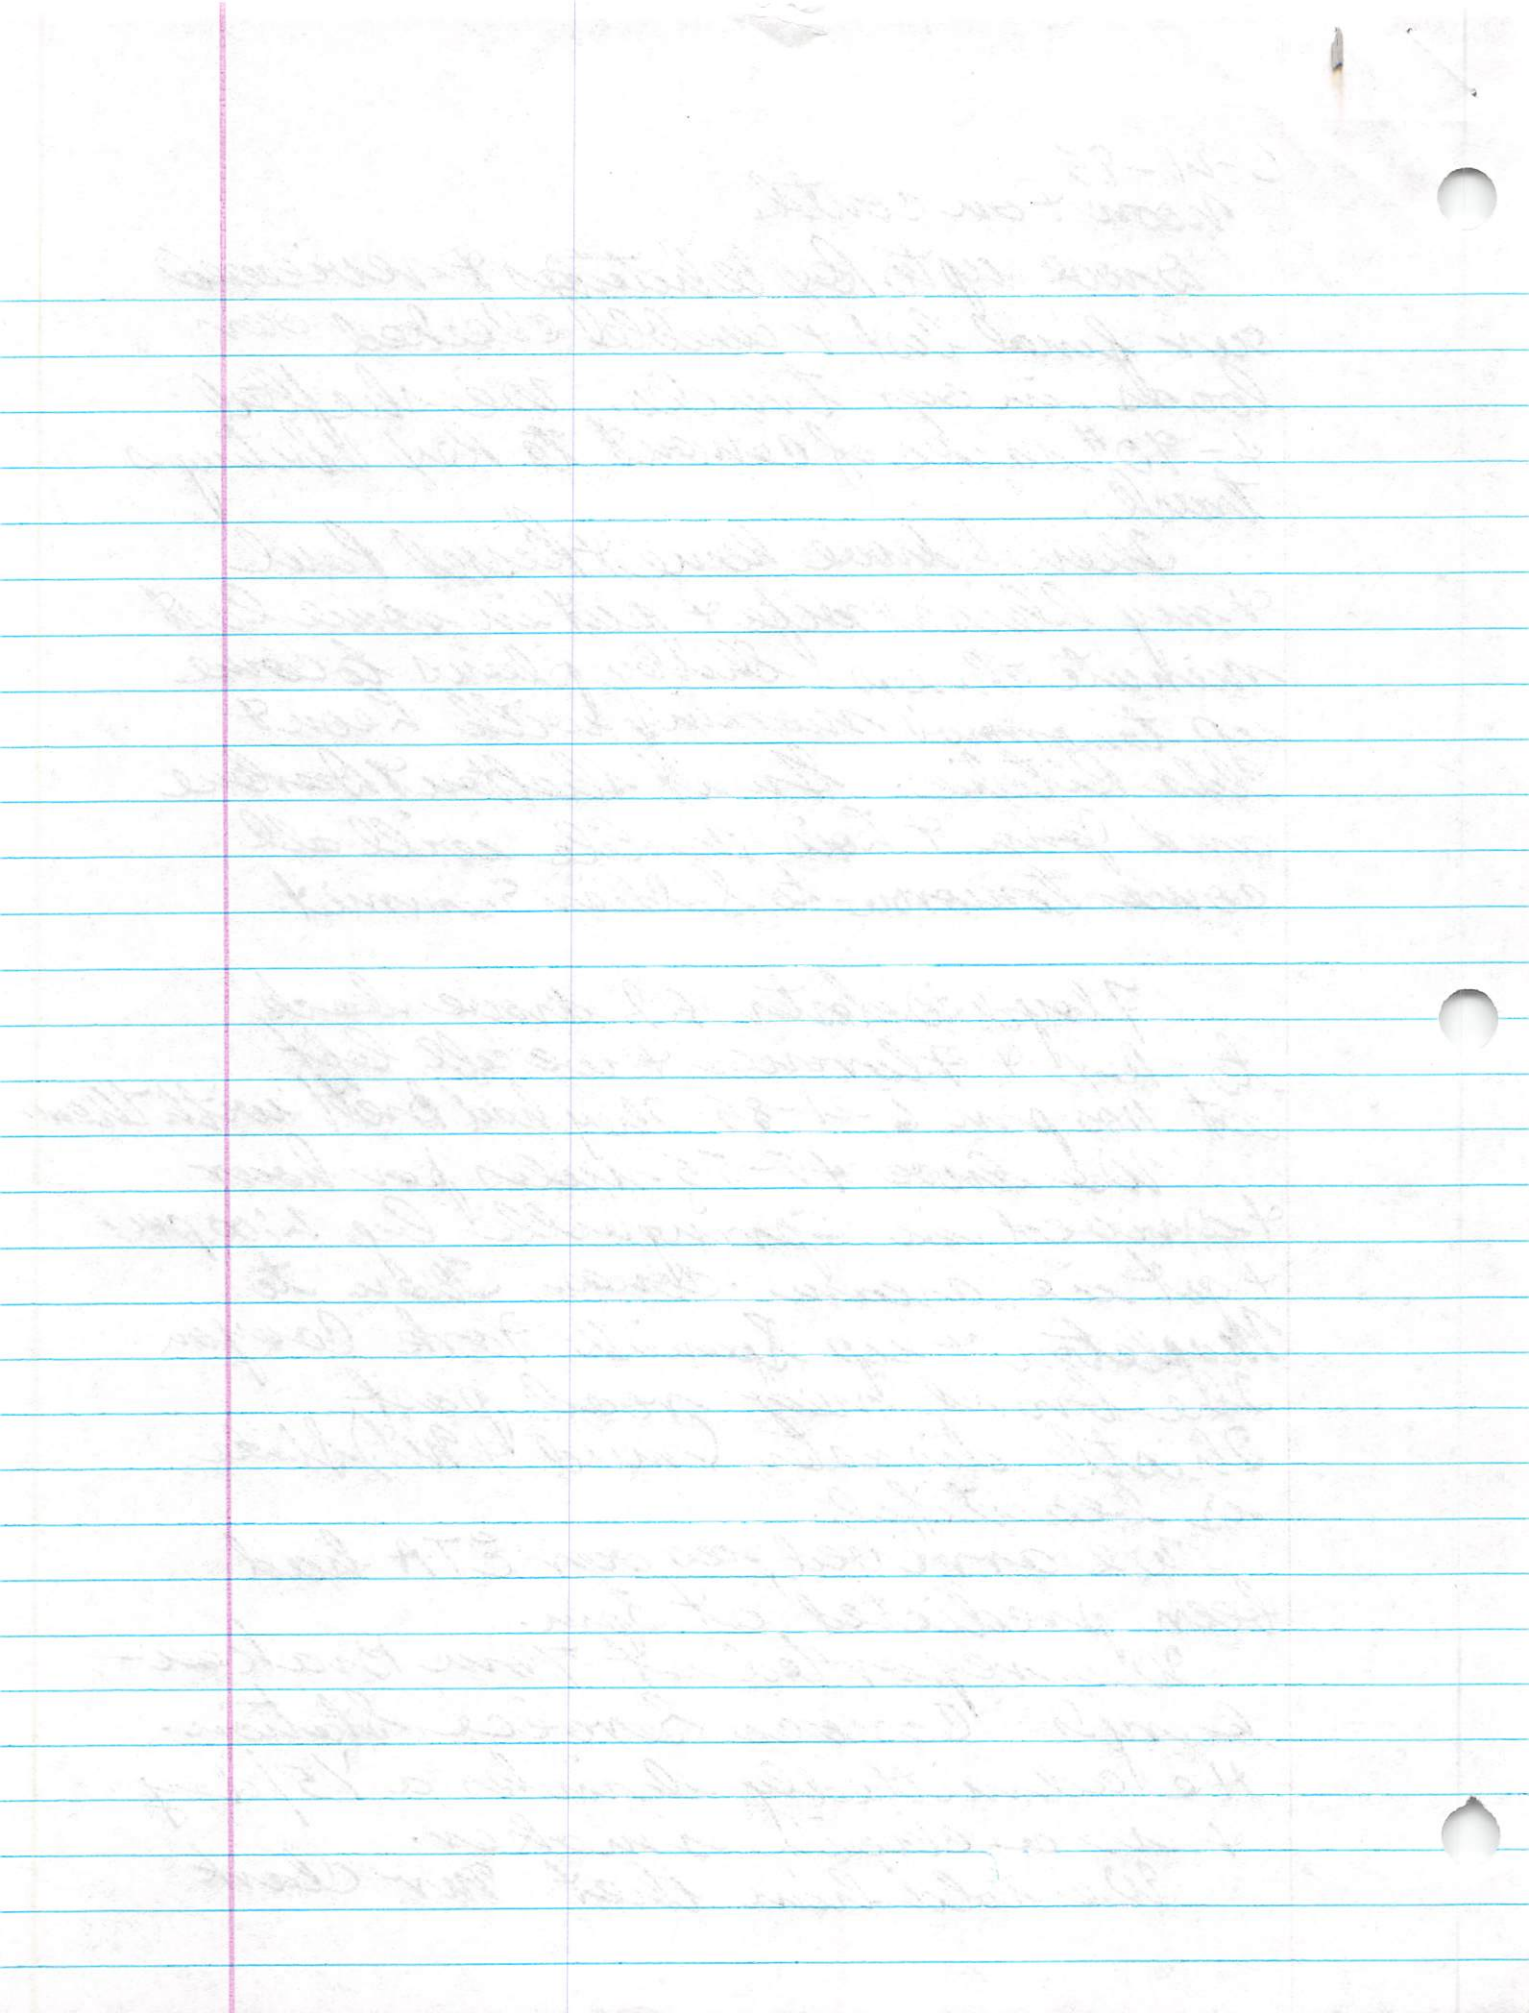

We drove 45-55 miles per hour & arrived in Springville by 2:00 pm. & got ice cream cones. Then to Mapleton & up Spanish Fork Canyon. The brand new road past Thistle disaster (mud & Mt.) slide is beautiful.

We arrived, as our ETA had been predicted, at 3pm.

We reported at Tom Brakenbury's Conoco Service Station. He admittedly drinks a 1/5/day & is a chain smoker.

We told him that Mr Clark

6-21-85 Sold. Sum #3

A. Lin and Mr Henry Yen, land-owners, had said that we could go ahead with our Soldier Grave fence project.

We also reported to Tom that there is still another grave to the south of town & across the tracks.

We then drove down to the Spring pond & backed out its back.

We made a board walk over the tiny creek & snipped out overhanging sage & willows to make a good path from tracks to grave site.

After this was accomplished we unloaded 10 sacks of cement and some gear.

We took Rex's wheel barrow to transport 2 bags at a time down to grave site.

Floyd then took the limb cutters & cut back all the willows on creek side overhanging two of the old corner posts.

Then Rex & Floyd dug six equidistant post holes & auger, shovels & crow bars.

I made a path to the water & dug a hole in the ditch to make a small pond to bucket the water out for mixing the

1-21-82 242 Am #3

A. Fair and the young pair, land-  
owners had said that we could go  
about with our children there  
four people. I was reported to Tom that  
there is still another group to the  
north of there & across the tracks.  
The house down to the  
young land & the kids who sit  
there.

We made a good walk  
over the trail over & through  
out some of our maps & hills  
to make a good path from house  
to house site.  
I often this was overhauled  
the land to 10 miles from  
and some of the  
the land to 10 miles from  
to transport 2 bags into the  
house to house site.  
I hope there had the land  
cultural & a look at the world  
on one side overlooking  
the of the old corner with  
the boy & I hope up my  
spicacious and had 5 cups  
drinks & some home  
I was a gift to the water  
& dug a hole in the dirt to  
make a small pond to put the  
the water out for watering the

Sold. Sum. #4

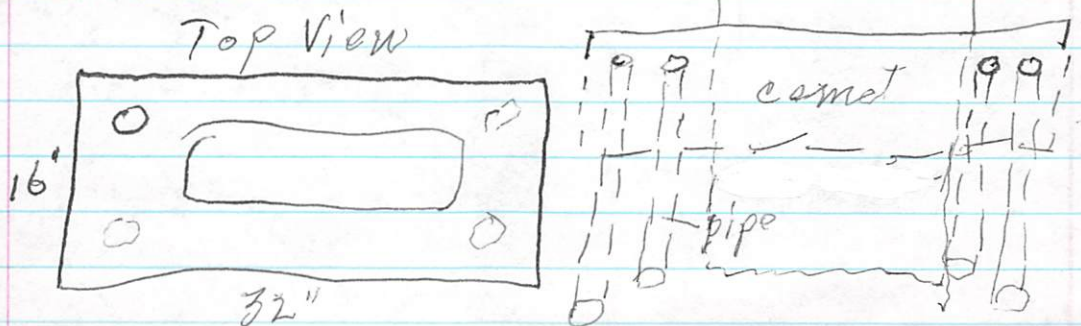

dry cement in Rex's wheel barrow.

We all kept persisting on the six post holes till we got each one  $2\frac{1}{2}$  deep. This will leave 4' out of the ground.

Now we dug a recessed area  $16" \times 32"$  to place our box form to erect the gravestone in. This stone was sent to Soldier Summit yrs. ago to be placed at this soldier gravesite, but it was at a time when people & homes were being moved away so this deed was never done according to self-styled (good style) historian Verne Jeffers.

Floyd Webster suggested 4 days ago to erect this monument as shown in the diggram below

The stone has been stored in the old pink brick "Soldier Summit" hotel for a long time in a west coal room - now owned by "Pappy" Keith E Walters. He has given us permission to place this stone.

1. The first part of the paper is a  
description of the problem. It is  
a problem of finding the area of a  
triangle. The triangle is formed by  
the points (0,0), (1,1), and (2,0).

The second part of the paper is a  
description of the solution. The  
solution is to find the area of the  
triangle. The area of a triangle is  
given by the formula  $A = \frac{1}{2}bh$ , where  
 $b$  is the base and  $h$  is the height.  
In this case, the base is 2 and the  
height is 1. Therefore, the area is  
 $A = \frac{1}{2} \times 2 \times 1 = 1$ .

The third part of the paper is a  
conclusion. The conclusion is that  
the area of the triangle is 1.

6-21-85 Soldier Summit #5

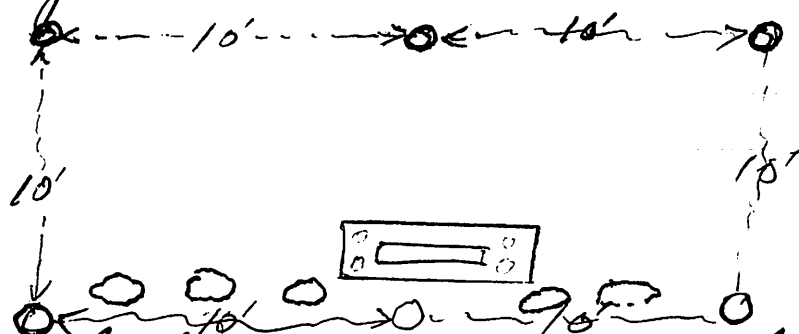

Now we placed the  $3\frac{1}{2}$ " diameter pipe in the post-holes to try them. The depth was just right.

Now we mixed the cement one bag at a time & set the 4 corner posts.

By this time about 5:00 pm, Theo & Cuddy Daybell drove into camp. They had the other 4-2" pipe. He brot those down to the grave site & we set those.

We found three of the 4 "original" corner posts, so we were able to square up the 4<sup>th</sup> one & found the dimensions to be  $20' \times 10'$ . We had originally measured, by guessing,  $30' \times 10'$  should be the dimensions.

So, we changed our plans slightly, and made 6 equidistant post-holes arranged like this:

We feel that heads of the bodies are on the slightly higher ground to the south & the feet on the north of the plot. The reason is, there are four "head rocks" along the south end in a straight line running east and west. No grave mounds are now discernable.

1. The first part of the paper is devoted to a general introduction to the subject.

The second part of the paper is devoted to a detailed description of the experimental apparatus and the results of the experiments.

The third part of the paper is devoted to a discussion of the results of the experiments and a comparison with the theoretical predictions.

The fourth part of the paper is devoted to a conclusion and a summary of the results of the experiments.

The fifth part of the paper is devoted to a list of references and a list of figures.

The sixth part of the paper is devoted to a list of tables and a list of equations.

6-21-85 Soldier Summit Grave BLP Project  
#6

Now we finished setting the last 2 "center" (smaller) galvanized pipe in their holes in cement.

We picked up our tools & placed them neatly by the pile of remaining sacks of cement & went to camp to prepare supper. We just started & Daryl & Dee Shumway arrived in their tan & brown 860 Dodge Ram Truck. They said they had "waited" an hour up by the motel for us. They knew we were already at gravesite.

Now, Daryl went around looking for a likely place to start his "barbecue dinner" for tomorrow. He found some loamy clay low ground & dug fervishly a hole  $2\frac{1}{2}$  feet in diam. & 30" deep. He measured the "dutch oven" into the hole & made it even larger.

He then fervishly gathered dry sage brush sticks & several old cedar posts. He split the posts & heaped all the sage & cedar into a pile & crushed it down.

He then made tinder of the dry twigs of the sage & started that under this wood pile.

When this had started well, he threw the dutch oven & lid upside down on the very hot fire.

As the fire burned down to hot coals, he shoveled 10" of coals into the bottom of the hole.

Now, he cleaned out the hot

6-21-85 Soldier Summit

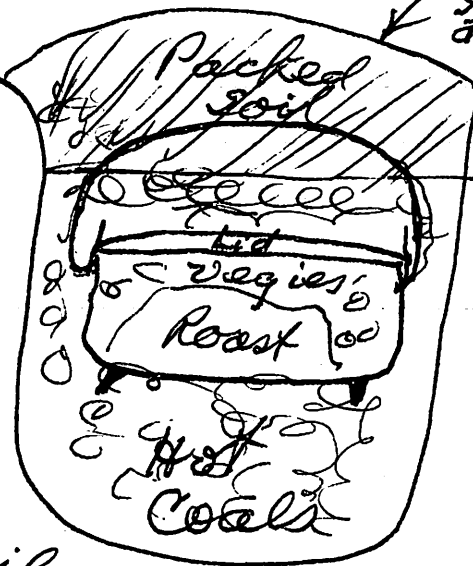

-7-

dutch oven & lid with a clean thick cloth. Now he laid in a large 14" loin roast in the bottom of the dutch oven and put his spicy vegetables around the roast.

Now the oven lid went on & the lid was covered by 3 layers of tinfoil (aluminum).

Now the oven was placed in the pit on the hot coals. Now about 10" more hot coals shovelled in on top of the oven.

Now soil was packed in on top of the coals & mounded over the pit. There must not be any smoke rising from the soil, else it will burn up the food in the oven.

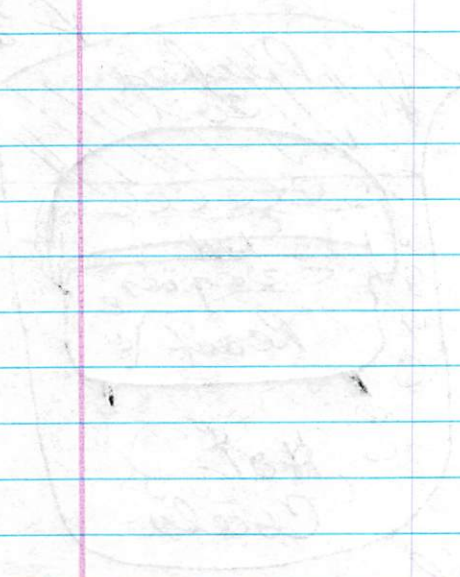

Now this is to be left for 5 hrs & it will be ready to eat.

This work was completed by 9:30 pm.

We went back to camp & had a nice <sup>filet</sup> fish supper brot in by Daryl Shumway & Dee - his wife. Strawberry Short Cake off to bed in my truck = Floyd Webster.

Rex, Florine & Brett slept in their Blue & White Chev Truck.

6-21-85 Sold. Sum. #8

Theo Daybell & Lucy slept in their 20' house trailer.

Daryl & Dee Shumway went back to where they parked their trailer to sleep there.

6-22-85 4:00 am I couldn't sleep any longer (force of habit) so I crawled out, dressed & built up the camp fire.

I sat in a chair and wrote this account of this project.

By 8:00 am Rex & Florine was up. Floyd Webster rolled up & Florine & Rex started cooking eggs, bacon, potatoes & pancake & strawberry sauce over it.

By 9:00 am. We were ready to work & John & Lois Corliss drove into camp. Leon & Elda Ritchie Shirley Green & drove in.

By 9:30 am we were down at the grave site working. Putting cement collars around each post which were set in cement last night by Theo Daybell, R.R. Green, Rex Whiting, & Floyd Webster.

We strung  $\frac{1}{2}$ " galvanized steel messenger cable thru the holes in the top (2" from top) holes in the

6-22-85 -9-

pipe. Corner posts were braced & cable was tightened & cable clamps were attached. The acetylene & torch burned the threads so they could not be loosed.

Because we still had enough cable, we decided to put a second cable around the perimeter of this graveyard.

Now we dug down in the center of our monument base area to plant the stone into the ground, besides being set in cement.

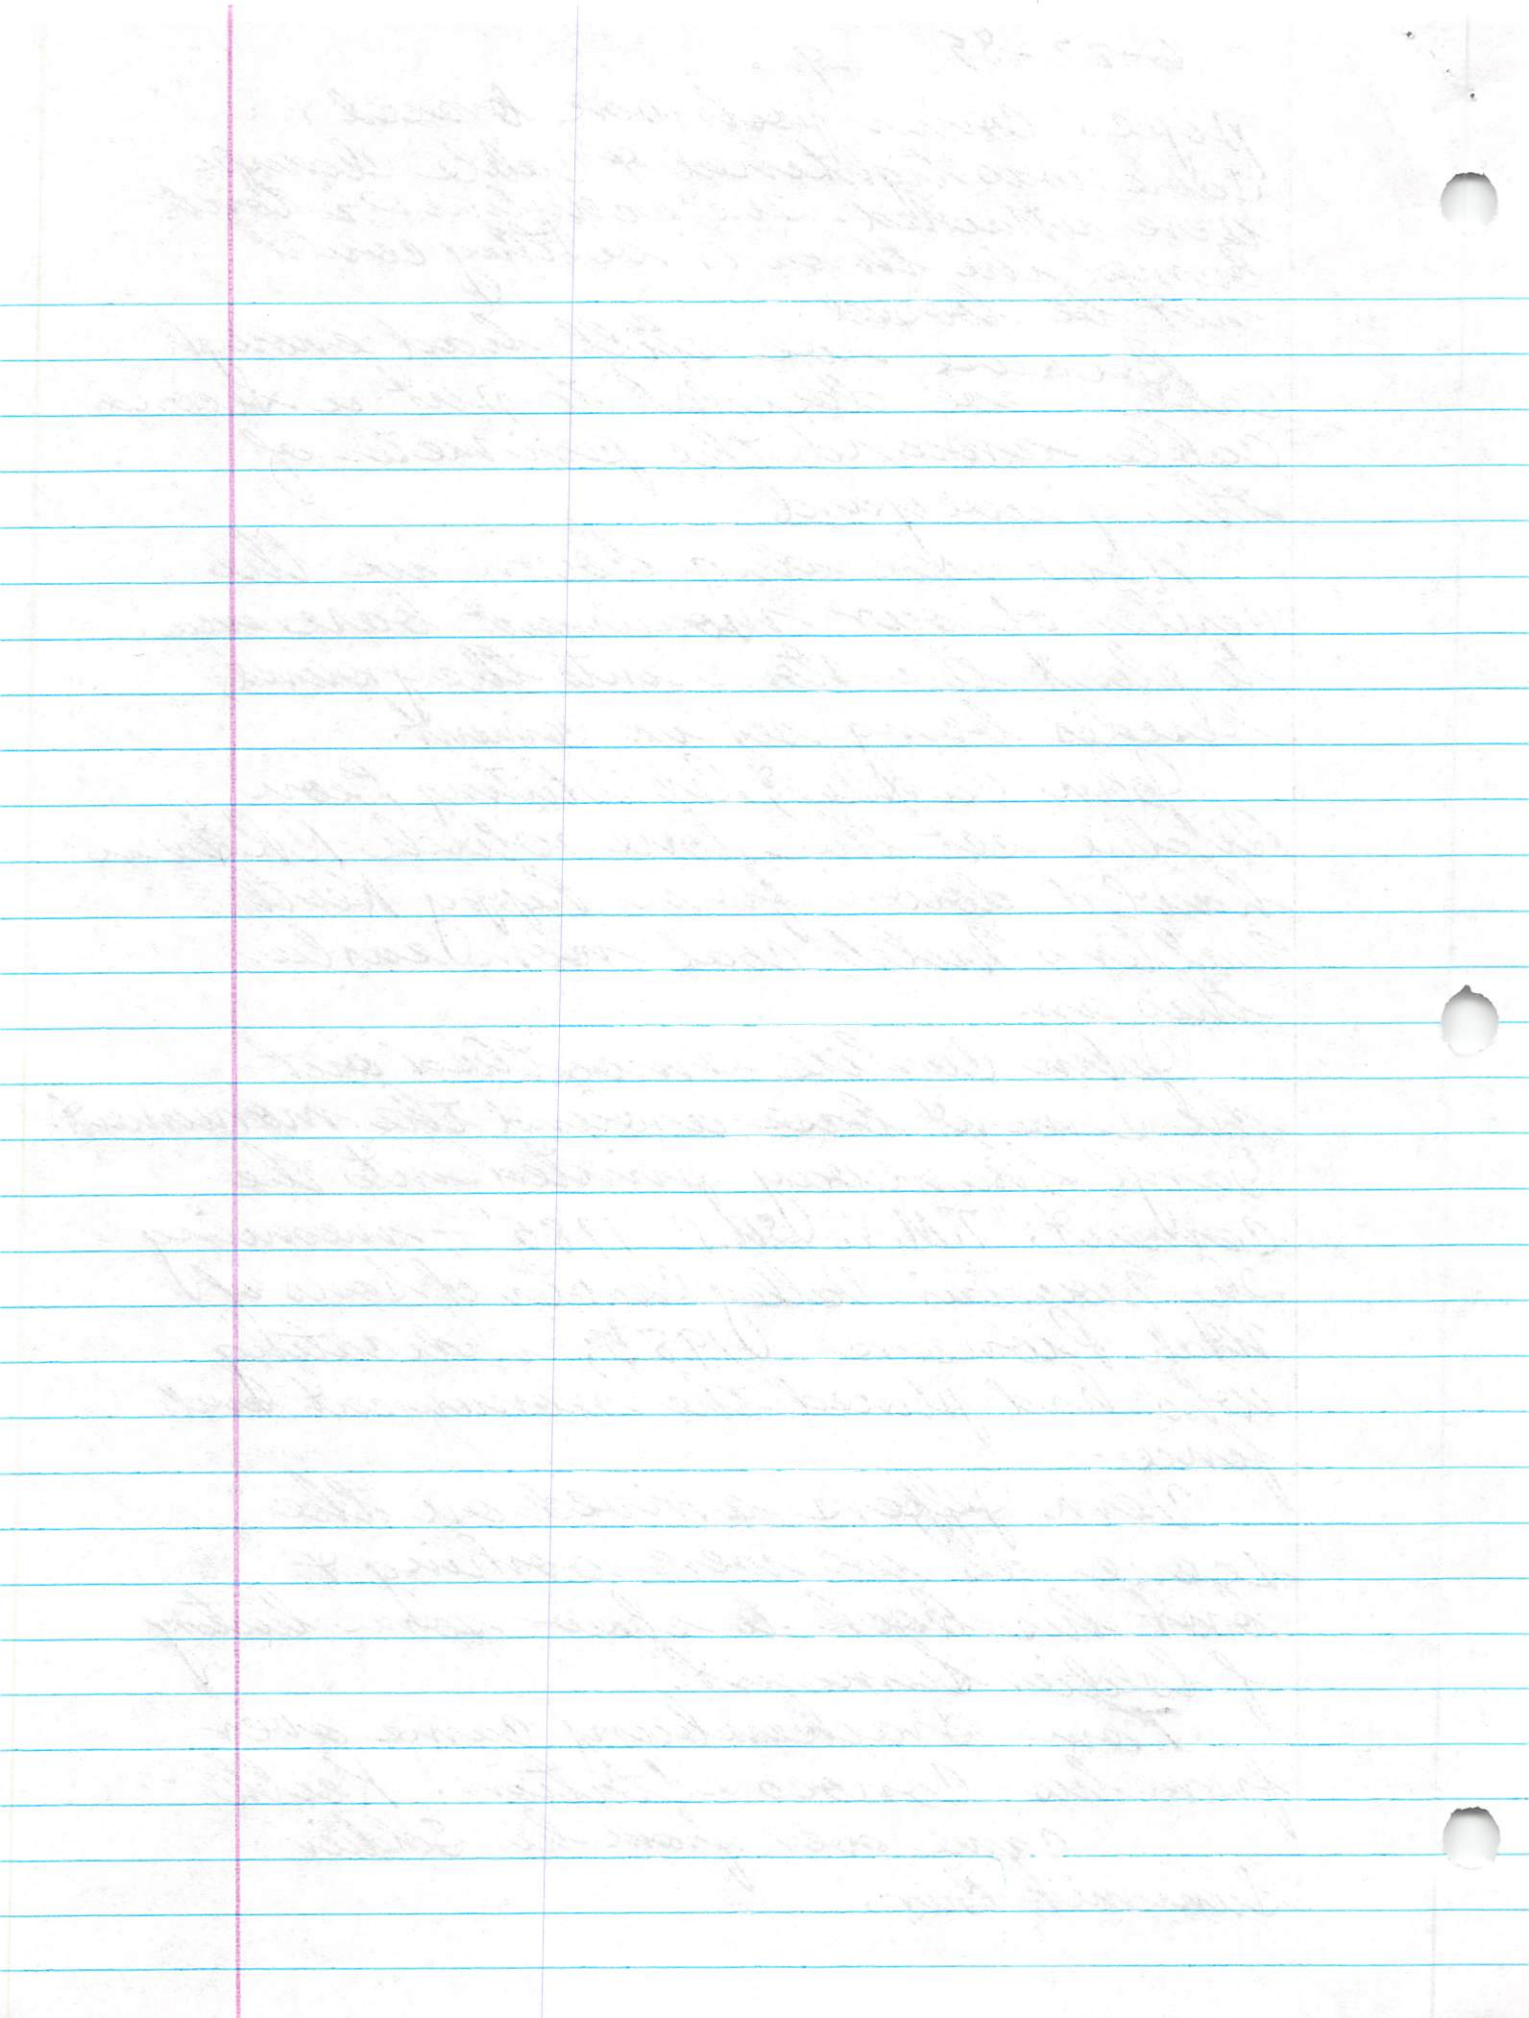

John Carlile & Rex Whiting Leon Ritchie set the stone which RR Green hauled down from Pappy Keith & Walter's Motel coal room earlier this am.

John Carlile smoothed out the cement base around the monument. Daryl Shumway printed into the cement: "T.M.V. S.U.P. 1985" - meaning The Mountain Valley Chapter of Sons of Utah Pioneers 1985; indicating who had placed the monument and fence.

Vern Jeffers arrived on the scene as we were working & brot his book to show some history of Soldier Summit.

Tom Brackenbury came over from his Conoco Station. Keith came over from his Soldier Summit Bar.

6-22-85 -10-

We were all happy to have our wives with us to enjoy this out of doors project.

By now we have completed our project & so painted posts & cable with Rustoleum "silver" spray paint.

Now we all took many pictures of all the crowd

Present were:

Floyd Webster - welder, digger

Rex A Whiting - DDS & hard worker

Florence Whiting - his wife & good cook

Verne Jeffers - historian from Springville.

Keith - former Sold. Sum. Marshall

Thomas Brackenbury - Conoco Man & Justice Peace

Brett Whiting - water boy & gr son of Rex

John Carlile - cement man & spray painter

Lois Carlile - wire brusher & supporter

Daryl Shumway - Master Barbequer & cement printer

Dee Shumway cook & supporter

Theo Daybell - worker & supervisor

Lucy Daybell - cook & supporter

Leon Ritchie - advisor, cable stringer

Elda Ritchie - " & supporter

- guest of Leon & Elda

Shirley Green - councilor - supporter

Robert Raymond Green - Pres SEP 1985. Ramrod.

Eighteen Total.

Verne Jeffers, as he parted, expressed his gratitude to all of us for doing

6-22-85 -11-  
this project. He has wanted it  
for a long time.

This was a good walk-away  
project and was very well done.

Now we went back to camp &  
had a most delectable Barbeque  
Pork Roast & vegetables by Daryl  
Shumway.

We broke up camp & loaded  
tools & each one bid farewell.

Floyd, Shirley & I stopped down  
by the tracks & Floyd & I hiked  
up to the graves of some Mexicans  
(so it is rumored by John Agard).

We met John Agard there.

We then drove up to say  
goodbye to Tom & Pat Brackenbury  
& then drove on down the Spanish  
Fork Canyon & on home.

This was worth the work &  
the while!

— Raymond Green
